

2013-2014 Scientist Mentoring & Diversity Program for Medical Technology DRAFT AGENDA

The International Center for Professional Development in partnership with its program sponsors and AdvaMed 2013: *The MedTech Conference* will host a training session for the 2013-2014 Scientist Mentoring & Diversity Program for Medical Technology, (SMDP MedTech).

The year-long mentoring program begins with a five-day experience in Washington, DC. This includes a three-day training session (Sept 21-25, 2013) immediately prior to AdvaMed 2013: The Med Tech Conference (Sept 23-25, 2013).

The program benefits ethnically diverse graduate students and post-doctoral researchers, including Hispanic Americans, Pacific Islanders, African Americans and American Indians.

SMDP MedTech Scholars are paired with industry mentors who work at medical technology companies. They participate in rigorous professional development training and have the opportunity to learn career-building skills, resume writing and interviewing techniques while exploring emerging technologies and careers at medical device and diagnostic companies.

SMDP Scholars and their mentors also create personalized mentoring plans, which they implement over the course of the year following their training. The teams communicate and carry out their mentoring plans by phone, email and virtually, aided by ICPD staff and the Mentoring Portal, an internet-based tool that supports mentor-mentee collaboration and communication at www.mentoringportal.com.
